Activity-5

BCM-External lightning

Requirements

Low Level Requirements:

- Head Lights and Indicators of the car should be turn off when the power is enabled.
- For Head Lights there are three modes:
 - 1) High Beam
 - 2) Low Beam
 - 3) Medium\Default

For all these modes the power should be Turn ON based on the Head Light Mode, one of the mode is selected

- For Indicator Power should be Enabled, when indicator mode to select whether Left, Right Indicator or Medium.
- When the car is turned off, head lights and indicators are turned off.

Research

Visibility on the road is crucial, and sometimes your headlights just won't cut it. Get everything you need for your car's external lighting at AutoZone. From headlight enclosures to light bars, from LED fog lights to side marker LEDs, we carry any car lights you need to see the road clearly.

Few things are more important than visibility on the road. This applies to more than just your car's headlights. In bad weather it can mean fog lights. Off-road it could mean an LED light bar. It could even mean making sure that there's enough license plate light to make sure your plate is easy to read. Visibility is crucial to the safety of drivers everywhere, but different lights are needed depending on where you drive. No matter where your drive takes you, AutoZone has the lights you need to get there.

If you've ever driven outside of the city, you know just how dark it can get on the highway. And it only gets darker on rural roads or off-road. Your lights should be on whenever it's dark outside, but sometimes you car's stock lighting just isn't good enough. Brighten up your ride today with top-notch exterior lighting products from AutoZone. We have the right parts for your vehicle to shine brightly in any situation.

Test plan:

SL.NO	TEST ID	DESCRIPTION	Expected input	Expected output	Actual ouput
1.	TC1	we can select the Headlight mode whether it should be in the High Beam, Low Beam High Beam Low Beam Medium Beam	5(High Beam) 4(Low Beam) 6(Medium /Default)	5 4 6	
2.	TC2	We can select the Front Indicator whether it should be Right or Left Indicator. In this again three modes are there High Beam Low Beam Medium Beam	5(High Beam) 4(Low Beam) 6(Medium /Default)	5 4 6	
3.	TC3	We can select the Back Indicator whether it should be Right or Left Indicator. In this again three modes are there High Beam Low Beam Medium Beam	5(High Beam) 4(Low Beam) 6(Medium /Default)	5 4 6
